Somero Equipment Owner

Dear Valued Customer –

**IMPORTANT NOTICE
For SXP Laser Screed
Owners**

Thank you for putting your trust in Somero Enterprises and purchasing the all-new SXP Laser Screed. To ensure continued high quality machine operation, we have been monitoring the quality of this machine since its launch and addressing concerns as we have become aware of them.

Because of several premature component failures, we are concerned with the strength of the auger support beam. To address this issue, a new beam has been designed and ordered for your machine (Serial #30000 to 30034). A Somero representative will install the new auger support beam on your machine before December 15, 2004. We will contact you soon to make the necessary arrangements.

In the interim, you will be receiving a temporary reinforcing bracket for the left side of the auger support beam. Please install this bracket as soon as you receive it following the attached instructions.

If you have any questions or concerns do not hesitate to call our customer support department at 906.482.7252 Option 4.

Thank you for your patience and understanding.

Respectfully yours,

Jim Desrochers
Director of Customer Support
