

Somero SiteShape™ - 3-D Grading System

Benefits

- One-man operation
- Easy surveying
- Laser accuracy
- Easily adapt to site conditions
- Grade faster
- Earn more everyday
- Improve Yields

Somero Enterprises, Inc. presents the 3-D SiteShape Laser Grading System for motor graders and bulldozers. The 3-dimensional SiteShape System adapts in the field to the "as-built" conditions that exist on every construction site.

Once you complete the easy steps, you are ready to begin operating.

- Arrive on site
- Set up geodimeter
- Shoot critical points on the ruggedized laptop
- Computer creates the "mesh"
- Screw prism onto the machine
- Start grading

New markets are now open for business: inclines, strip drains, catch basins, curved profiles, compound curves and, of course, precision flat work are all income earning opportunities for your capital equipment.

3-D SiteShape will increase productivity, eliminate manpower, and dramatically improve asphalt and concrete yields while ensuring your customers' happiness.

SiteShape™

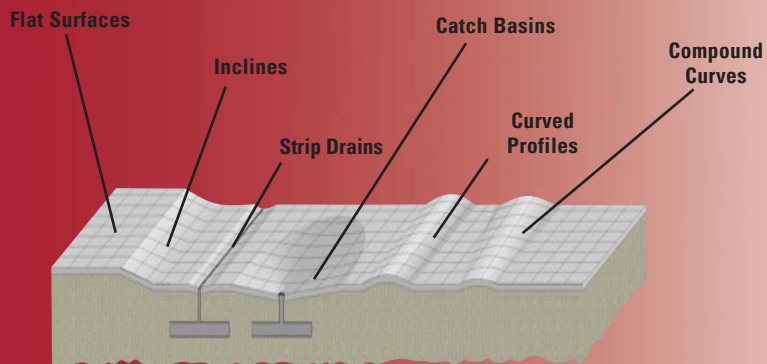

Somero's Multi-Topographical 3-D package offered in a size to fit your needs.

Full Package

A complete system for your Motor Grader or Bulldozer

Booster Package

A partial system that allows your full package to be used on additional equipment for a fraction of the price

Establishing Data Points

Dump data - Build Mesh
