

CopperHead® Mini Screed™C 3-D Profiler System® Sharing Kit

3-dimensional paving is not just for the large Laser Screed® anymore. The 3-D Profiler System® allows concrete to be placed over contoured sites automatically using the CopperHead® or Mini Screed™ Laser Screed®. With a specially developed 3-D sharing kit, Somero® has made it possible for you to equip your machine to capitalize on any size 3-D project.

The 3-D Profiler System® is ideal for use on parking lots, parking garages, loading docks, service ramps and driveways.

The 3-D Profiler System® is easy to learn and use. It is compatible with large and small Laser Screed® models, which allows you to share components between your equipment. That gives you better utilization of *all* your Laser Screed® equipment.

**Get more utilization out of your equipment.
Add the 3-D Profiler System® to your
CopperHead® or Mini Screed™ today!**

**Already have a Somero® 3-D Profiler System®
for your large Laser Screed®?
Call us about a sharing kit for your small Laser Screed®!
