FOR IMMEDIATE RELEASE

2008 CONEXPO-CON/AGG Exhibit Features
Large and Small Laser Screed® Equipment plus New Pervious Concrete Head
New Pervious Head Attachment for SXP® Laser Screed brings
laser-controlled accuracy to pervious concrete placement and finishing.

The 12-foot Pervious Head is an attachment for the large SXP Laser Screed that is compatible with the distinct characteristics of pervious concrete.

LAS VEGAS—The Somero Enterprises, Inc. booth (S-8051) at this year’s CONEXPO-CON/AGG trade show features the large SXP and the smaller CopperHead® Laser Screed in addition to the laser-guided PowerRake®. Somero is also debuting the first-ever Laser Screed head designed exclusively to handle pervious concrete.

“The emphasis on ‘Green’ construction and technology this year makes this the perfect venue to introduce the pervious head,” said Howard Hohmann, vice president of sales for North America. “Somero is proud to be part of this effective means to address environmental issues and support green, sustainable growth,” said Hohmann. Pervious concrete is porous and allows storm water to seep back into the ground meeting the Environmental Protection Agency (EPA) storm water regulations.

Somero engineers ran the 12’ pervious head attachment to the large SXP Laser Screed through extensive testing during the past six months to ensure its compatibility with the distinct characteristics of pervious concrete. Partnering with Dale Fisher, president and CEO of PCI Systems LLC that deals exclusively with pervious concrete, the pervious head was put to the test screeding thousands of square feet of pervious concrete for pervious parking lots in South Carolina and Georgia.

CONEXPO-CON/AGG is held every 3 years to showcase the latest equipment, products and technologies for the construction industries. The show runs from March 11-15, 2008, at the Las Vegas Convention Center, attracting 125,000 industry professionals from around the world with more than 2,000 exhibitors. Somero Enterprises, leaders in concrete leveling, contouring and placing equipment, was founded on innovation that makes the concrete placement process easier, more productive, and more profitable. Its innovation continues to make the concrete construction job site more and more productive.

Somero® Enterprises, Inc., sells and markets its equipment in over 50 countries including Russia, China, the Middle East and India, with customers in every time zone around the globe. Its SXP® Laser Screed® and CopperHead® XD Laser Screed® are now specified in the construction of warehouses, retail centers, ice rinks and other commercial construction projects that require extremely flat concrete slab floors. With headquarters in New Hampshire, USA, Somero operates a manufacturing facility in Michigan, USA, and an international sales and service office in Chesterfield, England, with customer service calls answered 24/7 on a dedicated global support line. Somero is listed on the Alternative Investment Market (AIM) on the London Stock Exchange (SOM.L.) For more information please visit www.somero.com.
