

PowerRake® 3 with the 3-D Profiler System®

3-D Sharing Kit for PowerRake 3

With the Somero 3-D Profiler System® your PowerRake® can be on the jobsite more often, preparing the sub-base or raking the concrete in front of your screeding equipment.

The Somero 3-D Profiler System® is a technological breakthrough which allows concrete to be placed over contoured sites automatically using Somero® equipment. This highly accurate system, until now only available on Somero's screeding equipment, is now available on the PowerRake® 3, *making your investment even more valuable!*

Capitalize by expanding your services to include concrete paving. The 3-D Profiler System is ideal for use on parking lots, loading dock areas, service ramps, and driveways.

The Somero 3-D Profiler System® is easy to learn and use and comes complete with all of the necessary components to get you profitably paving right away. Utilize your PowerRake® more often and add more money to your bottom line!

PowerRake® 3

PowerRake® 3 with the 3-D Profiler System®

- Utilize your equipment more often.
- Rake 3-D sub-base to improve concrete yields.
- Rake in front of 3-D equipped Somero® Laser Screed® equipment to get the same benefits from using your PowerRake on a slab-on-grade job.

Kit Includes

- Version 10 3D Software
 - Toughbook Laptop Mount
 - Laptop and Radio Power Module
 - Cross Slope Sensor
 - Sub-base Plow
 - Target Mount Adapter
 - Sonic Tracer Mounting Tube and Brackets
 - 3-D Wire Harness, Dash Wiring, and Cables
-
